

Highlights

- High power density
- Intelligent charging modes
- Full set of protections
- CAN2.0B interface
- Capable of parallel operation
- SAE J1772 or IEC 61851 compliance
- IP67 sealed housing

LV-to-LV DC-DC Converters & Battery Equalizers

Highlights

- Input to output non-insulated
- Full set of protections
- IP67 sealed housing
- Lightweight and compact size allows ease of integration

Customization

- Input/Output reverse polarity protection
- Switched and unswitched outputs
- Ignition enable signal
- Parallel operation
- CAN 2.0B interface

LV-to-HV DC-DC Converter

Highlights

- Programmable battery charging current
- Galvanic isolation between input and output
- Full set of protections
- CAN 2.0B interface
- IP6K9K sealed housing

Customization

- Input reverse polarity protection
- Customized CAN protocol
- J1939 communication, bootloader, diagnostic
- UDS bootloader, diagnostic
- MPPT for PV

Model	Input Voltage	Output Voltage	Output Power	Cooling
PD1600-450LC	9-60V	255-450V	600W	Conduction

HV-to-LV DC-DC Converters

Highlights

- Galvanic isolation between input and output
- Input reverse polarity protection
- Full set of protections
- CAN 2.0B interface
- IP67 sealed housing

Customization

- Parallel operation
- Customized CAN protocol
- J1939 communication, bootloader, diagnostic
